Selected US specifications from IPC sub-class E21B

(54) Casing centraliser

(57) There is disclosed a casing centralizer 20 which comprises a tubular body or sleeve 21 adapted to fit about a joint of casing, and blades 22 extending longitudinally along the outer diameter of the sleeve in generally equally spaced apart relation, with the body and blades being cast as one metal piece. The ends of the centralizer are provided with castellations 25, 25A arranged so that a pair of centralizers will interengage with their blades 22 aligned. The centralizer may also be provided with an insert 24A of radioactive material which acts as a depth marker.
